13. Provide oral care every 4 hours. Oral care freshens the mouth after respiratory secretions have been expectorated. Research is promising on the use of chlorhexidine oral rinses after oral care to reduce bacteria, and possibly reduce the incidence of nosocomial pneumonia (Kollef. 1999). 14. Encourage activity and ambulation as tolerated.

As a rule, eating more high-fibre foods can prevent constipation. Be aware though, that if constipation is a result of Colitis or Crohns disease, increasing fibre intake could have a detrimental effect - if in doubt, speak to your GP before making any changes to your diet. There are two different types of fibre: soluble and insoluble.
