The personal computer (PC) defines a computer designed for general use by a single person. While an iMac is definitely a PC, most people relate the acronym to computers that run on the Windows operating system instead. PCs were first known as microcomputers because they were complete computers but built on a smaller scale than the huge systems in use by most businesses.

Windows 10 is a major version of the Microsoft Windows operating system that was released on July 29, 2015. It is built on the Windows NT kernel and follows Windows 8.. Part of the reason Microsoft decided to name the 2015 release "Windows 10" (and skipped "Windows 9") is because the operating system is designed to be a new direction for Microsoft. One of the primary aims of Windows 10 is to ...
