We should say for those of who are not familiar, IPC 1601 is the final, formal definition for dealing with moisture absorption in printed circuit boards. It's very similar to IPC/JEDEC J-STD-033 Moisture Sensitivity and Handling in Components. This is the same kind of specifications for circuit boards. Phil Moisture in circuit boards, either the way they've been stored, the way they've been shipped, the way they're handled at incoming and receiving, and in the storage room.
