### Download IT Auditing Using Controls To Protect Information ...

In a risk-based approach, IT auditors are relying on internal and operational controls as well as the knowledge of the company or the business. This type of risk assessment decision can help relate the cost-benefit analysis of the control to the known risk. In the "Gathering Information" step the IT auditor needs to identify five items:

### IT Auditing and Controls - Planning the IT Audit

Both automated controls and manual procedures should be used to ensure proper coverage. These controls help ensure data accuracy, completeness, validity, verifiability, and consistency, and thus ensure the confidentiality, integrity and availability of the application and its associated data. So what is an application?
