TagUnit can be used to test the taglibs within the JSP Pages. Other frameworks to test JSPs are listed below. #5) TagUnit. JSP tags are either built-in or user-defined tag elements that help remove a lot of work from JSP to separate reusable components. The functionality of Tags is written in Java classes and can be used within the JSP as any ...

25 Best Java Testing Frameworks and Tools for Automation Testing

vim colors FAQ: Can you provide details on how to control/configure colors in the vim editor (i.e., vim color settings)? Sure. When using vim syntax highlighting, a common complaint is that the default color scheme is a little too bold. In this article I'll try to demonstrate how you can change the colors in vim to be a little more pleasing, or at least be more in your control.
