Fluidization occurs when small solid particles are suspended in an upward- flowing stream of fluid, as shown in Figure R12.3.1. Figure R12.3-1From Kunii and Levenspiel Fluidization Engineering, Melbourne, FL 32901: Robert E. Krieger Pub. Co. 1969. Reprinted with permission of the publishers

Adapted from D. Kunii and O. Levenspiel, Fluidization Engineering (Melbourne, Fla.: Robert E. Krieger Publishing Co., 1977). (Note nomenclature change: In the text and lecture, ϵ = porosity, while in this section, ϵ = porosity.) This relationship is a consequence of the fact that the mass of the bed occupied solely by the solid particles is the same no matter what the porosity of the bed.
