One of the most successful stories of natural products from endophytes is the multibillion-dollar anticancer drug Taxol

(paclitaxel). The compound was initially isolated from the Pacific yew tree, Taxus brevifolia (Wani et al., 1971), a traditional medicinal plant used by Native Americans (Gunther, 1945). Since then, several other plants from the genus Taxus have been reported to produce Taxol.

#### Medicinal Plants: Their Use in Anticancer Treatment

These compounds are a great resource in the discovery of new lead compounds,

as most of the times, these compounds are known to carry a lot of medicinal significance. On the other side, isolation of bioactive compound is relatively a simple process, but screening of the isolated bioactive compound for required metabolites production is a cumbersome process.

Molecular Approaches to Screen Bioactive Compounds from ases Phenolic compounds from medicinal plants are constantly explored for new therapeutic use.
