Vim has an very steep learning curve, making it difficult to learn. However, this is mostly related to muscle-memory. While a beginner can learn the HJKL, I, and ESC keys in about 5 minutes to be able to edit their files, it is an extremely steep learning curve to get used to them — and many, many more keybindings available besides them. See More

1 Overview of make. The make utility automatically determines which pieces of a large program need to be recompiled, and issues commands to recompile them. This manual describes GNU make, which was implemented by Richard Stallman and Roland McGrath. Development since Version 3.76 has been handled by Paul D. Smith. GNU make conforms to section 6.2 of IEEE Standard 1003.2-1992 (POSIX.2).
