The calculated balanced reinforcement ratio  $\rho_b$  and the actual FRP reinforcement ratio  $\rho_f$  for each FRP-reinforced concrete beam are given in Table 14.2. Each beam was reinforced with three FRP bars in the tension zone, i.e., two corner bars and one center bar as shown in Figure 14.2 , and two steel bars in the compression region.

### Reinforced Concrete Beam - an overview | ScienceDirect Topics

Reinforcement is a process of speciation where natural selection increases the reproductive isolation (further divided to pre-zygotic isolation and post-zygotic isolation) between two populations of species. This occurs as a result of selection acting against the production of hybrid individuals of low fitness. The idea was originally developed by Alfred Russel Wallace and is sometimes referred ...

### **Reinforcement (speciation) - Wikipedia**

The two types include: Positive reinforcement involves adding something to increase response, such as giving a bit of candy to a child after she cleans up her room. Negative reinforcement involves removing something in order to increase response, such as canceling a quiz if students turn in all of their homework for the week.
